Look to Cuba

Editor, Virginian-Pilot:

I have a request for Commander Kennedy of the martial group—John or Bobby or Ted—don't invade Mississippi, concentrate on Cuba.

If the C.I.A. could possibly place a few Cuban patriots in the right place at the right time, maybe they could say "quick kill" on a few bearded sugar merchants.

If secrecy is the holdup, remember during World War II we developed the "A" bomb, cracked the Japanese code, captured a German sub in mid-ocean and they were secrets for years.

As our present position darkens day by day, I wish we had a few visible signs to assure us something is being done. Soon the cry will be "stop them at any cost!"

Maybe we could use the ruse of San Juan Hill Day anniversary to invade and re-enact the famous charge.
